Cardboard range
catalogue

We guide you through the different types of cardboard packaging to help you find THE best solution for your needs.

Our Specialties

- **Lid product line (recycled PET)**
- **Top seal solutions**
- **Fully cellulose-based trays**
- **Optional PE liner**
- **Anti-humidity varnish coating available**
- **Over 400 models** to cover every need

Our Advantages

- **100% RECYCLABLE**
- **100% CUSTOMISABLE**
- **100% SUSTAINABLE**

Food Packaging plays an essential role in food preservation, food safety and public health.

It is a key component to:

protect food even during transport

reduce food waste

guarantee hygiene & food safety

extend product shelf life

inform customers

enhance food presentation

SOLID CARDBOARD & HYBRID

Technical Information

- Monomaterial
- Suitable for high-humidity products (varnish, PE, etc.)
- Compatible with flowpack & stretch film
- High visibility & strong protection
- Practical: turns into a display tray, from field to table
- Option: customised graphics

INDUSTRIAL**

SOLID CARDBOARD

recyclable

**The COMPOSTABLE packaging
solution for fruits and vegetables**

Technical Information

- Monomaterial
- Suitable for high-humidity products (varnish, PE, etc.)
- Compatible with flowpack & stretch film
- Folded and reinforced edges
- High visibility & strong protection
- Practical: turns into a display tray, from field to table
- Option: customised graphics

Technical Information

- 100% recyclable & compostable
- Certified OK Compost Industrial
- Available in small, medium and large formats (on demand 29 references)
- Biodegradable under industrial composting conditions (55–60 °C, controlled environment), including inks and additives

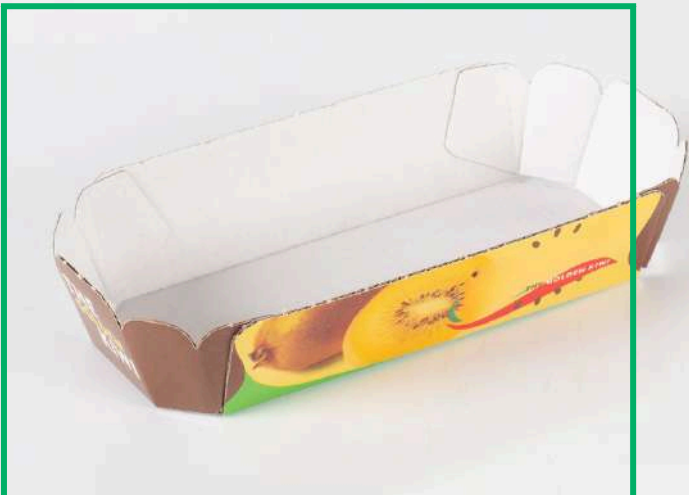

The trays are designed to decompose safely within an **industrial composting facility**, where controlled conditions (**temperature**, regulated **humidity**, and active **aeration**) accelerate the natural breakdown process.

In this environment, **all components**, including the cardboard base, bio-polymer coating, inks, and additives, **transform into organic matter and CO₂** with no harmful residues.

Industrial composting provides a **complete** and **certified end-of-life solution**, making the trays a truly sustainable choice for circular packaging.
