Editorial

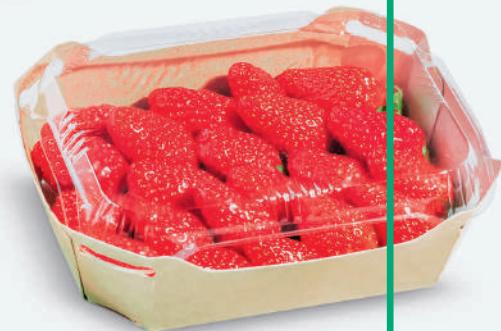

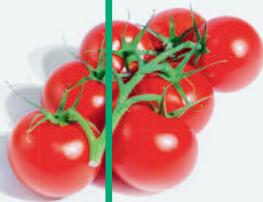

Since our creation in 1972, we have always been driven by the pioneering spirit that made us: as a European food packaging specialist, we aim to offer the market innovative and environment friendly products, but we also aim to build relationships of trust with our customers based on our professionalism and perfect service. Our customers' satisfaction guides each decision and action we take. This is why the development of our Group is inseparably bound up with strong values that we carry every day, which are excellence, respect, team spirit, and openness to progress and performance. But our greatest wealth above all are our employees brought together around one common company mission that they support with pride and passion.

All this makes GUILLIN a committed and responsible brand with a single mission: protect your food.

European leader in the manufacture and sales of food packaging, we are at your service to meet your needs. The GUILLIN Group is made of women and men who carry strong values and who work every day to guarantee you the highest level of service.

Group
GUILLIN

François GUILLIN
Chairman of the Board of Directors

Sophie GUILLIN
CEO

Created in 1972, the GUILLIN Group is a family business founded upon the values of a rural area, but focused on innovation and international development:

Our profession: designing, manufacturing and marketing innovative packaging solutions through our key business values «quality, range, service»

Our driving force: evolving thanks to continuous innovation

Our ambition: being the European manufacturer of choice in food packaging solutions and serving its customers, consumers and the planet.

Key figures about **GUILLIN**

|---------------------------|--|-------------------------------------|
| 32 companies | 300 brands models patents | 11 distribution companies |
| 3 000 employees | Commercial presence in more than 70 countries | 21 production sites |
| 741 M€ Turnover | 21 500 products | |

Our difference

Performance & Service

We have developed a dual industrial and logistics excellence that allows us to offer wide ranges and transform our customers' complex problems into simple solutions in order to provide them with a unique, responsive and flawless service (manufacturing quality, wide ranges, 12,000 products on stock).

Innovation & Design

Pioneering and innovating since the beginning, we anticipate the future needs that will impact our products (respect for the environment, preservation and protection of food, evolution of lifestyles) and we continuously create new packaging solutions of which design combines aesthetics, quality and functionality, with the objective of improving the final consumer's life. **GUILLIN Group innovations are protected through patents, patent designs, trademarks,... We will robustly defend our intellectual property rights.**

Responsible Leadership

We take responsibility for a sustainable leadership by supporting a well-reasoned usage of packaging and by totally integrating them into the circular economy and environmental impact. Right from its design phase, each product has to meet environmental requirements which relate as much to its own features as to the place where it is manufactured in order to reduce transportation emissions.

Our commitments to the environment

Since 1972, protecting food and the people has been our mission, by creating adapted, evolving and environmental-friendly food packaging solutions: protecting is part of our DNA.

Today, the major subject to be dealt with is global warming, CO₂ emissions and their impact on the planet; this is why our commitment to the environment is focused on one objective, which is producing 100% responsible packaging to keep our carbon footprint to an absolute minimum. Our concern is constantly to reconcile the preservation of the environment and the protection of people, while making sure our actions favour both.

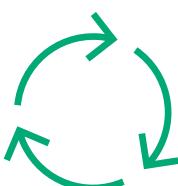

We limit our
environmental
impact

As supporters of a reasoned use of packaging, we make sure its carbon footprint is as small as possible during its whole life cycle.

For more than 20 years, we have been ecodesigning our packaging, which resulted in a reduction of 40% in weight for some references, also sharply decreasing the transport footprint.

We integrate at least 30% rPET into our PET packaging, which significantly improves its carbon footprint. This percentage may vary depending on the applications and it can reach 100% for some specific ranges. By 2025, we aim to be over 50% in 2025. Cardboard packaging that we manufacture are FSC® certified (they respect sustainable forest management).

We are
100% part of
the circular economy

Our packaging is 100% recyclable, reusable or compostable.
It is a reliable ecological and economical alternative for all needs.

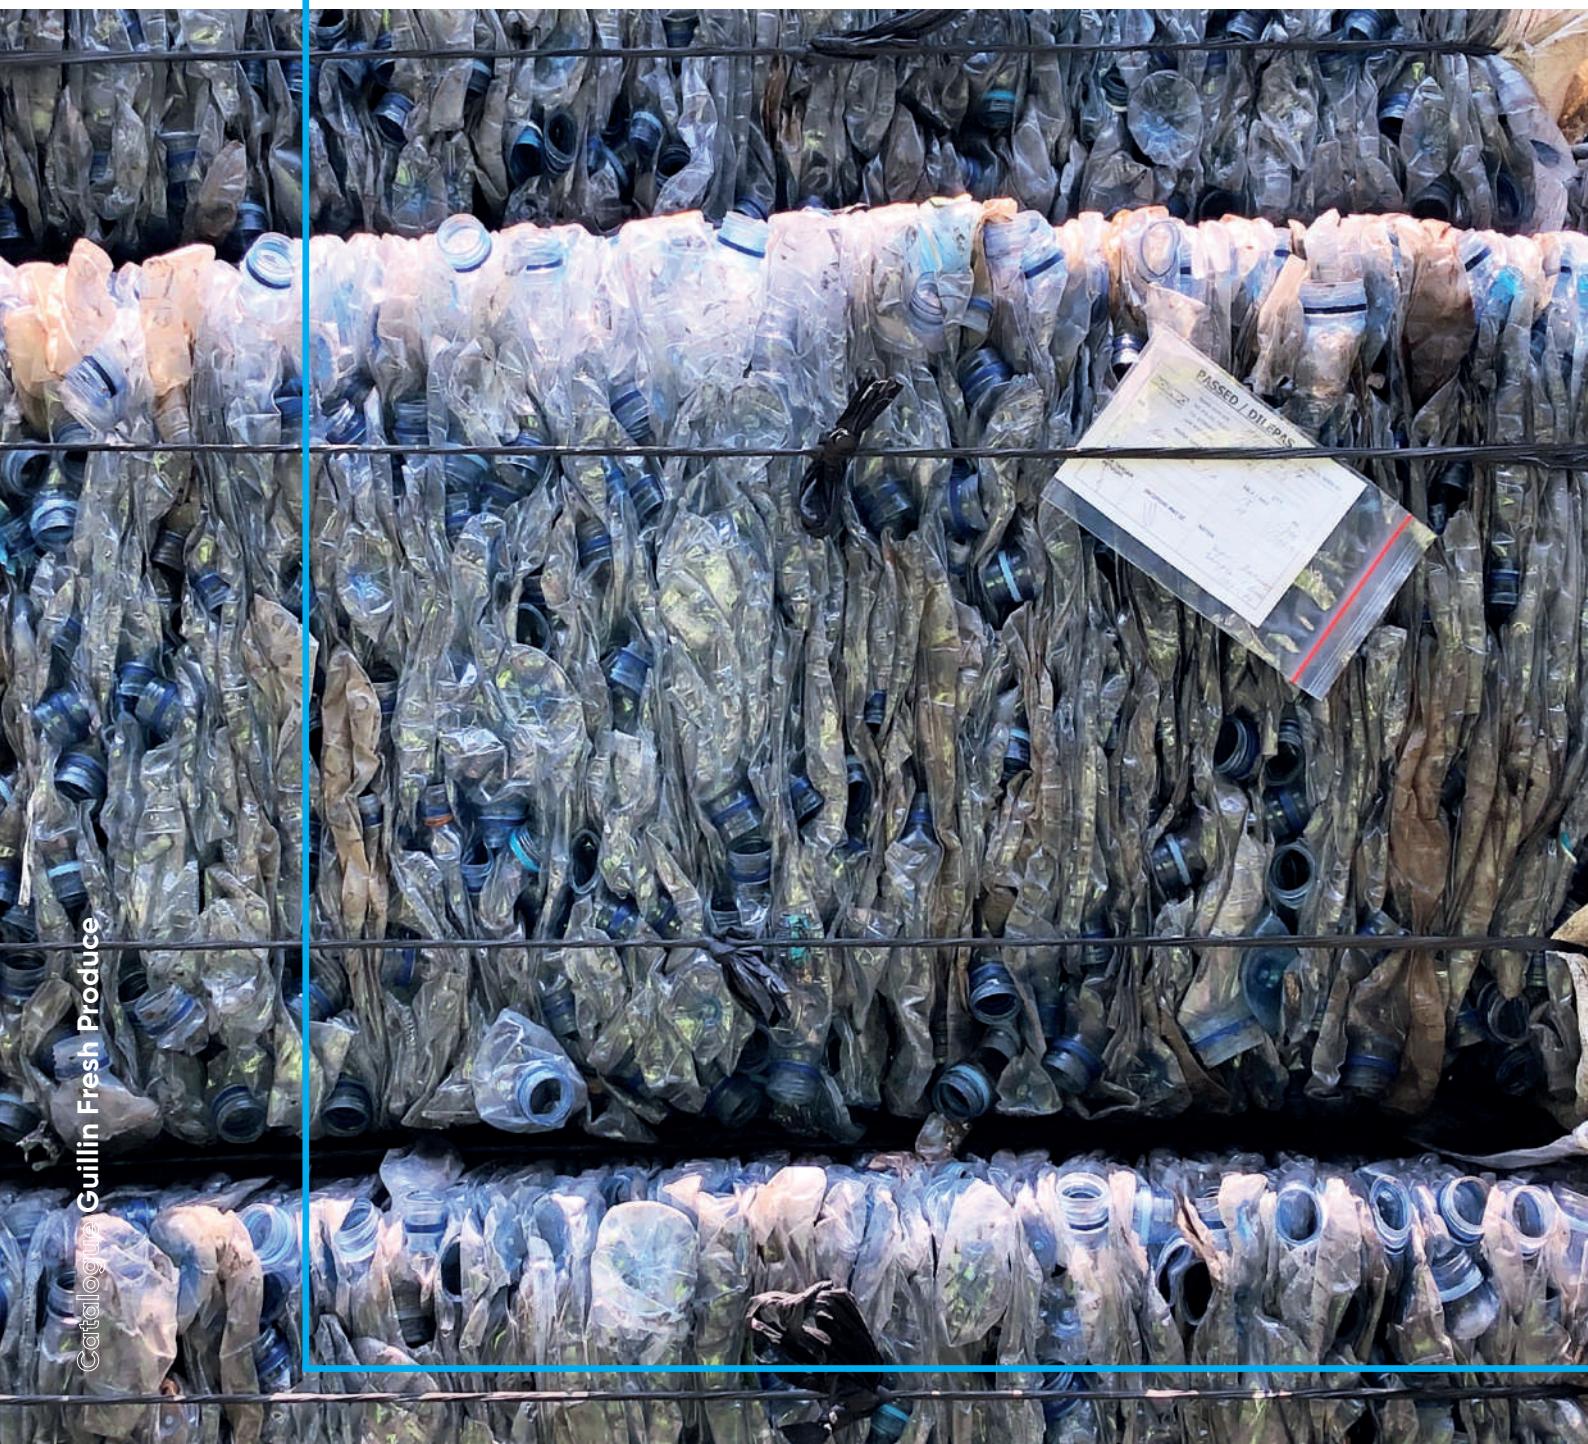

We commit
ourselves through
concrete actions

We act so that the circular economy, collection, sorting, recycling and composting of our packaging become mass reality and to encourage responsible behaviour.

In parallel, we started PET collection actions on our sites, which regularly mobilise all our employees.

Finally, we invest in our production sites to make them ecofriendly: closedcircuit water use, low-consumption equipment, no air emissions, automatic waste sorting, energy retrieving from our heat systems in order to heat our buildings, no loss of material pellet (involvement in the Clean Sweep® operation / French MORE 2019 label obtained).

Prevented Ocean Plastic™

Together, let's make plastic its own resource!

Committed since 2020 to saving the oceans, GUILLIN is a Founding Partner of Prevented Ocean Plastic™. We incorporate high quality recycled material in our recyclable packaging, collected from the Indonesian coastline and processed in a socially responsible way, certified by OceanCycle®.

Thanks to this partnership, nearly 1 billion plastic bottles will not end up in the rivers and oceans.

With this strong commitment, we hope to encourage responsible behaviour. If thrown in the right bin, plastic can be collected, sorted and recycled: it becomes its own resource. Together, let's make sure that this happens.

**Nearly 1 billion bottles
collected, sorted, processed and
reintegrated into our packaging**

Our mission

ON THE SIDE OF PRODUCERS AND CONSUMERS EVERYWHERE

With four production sites in Europe specialising in manufacturing thermoformed packaging for packing and protecting fresh fruit and vegetables, plus a cardboard packaging production site, the Fresh Produce division of the GUILLIN Group provides its clients with a range of fully recyclable or compostable products.

The GUILLIN Group's manufacturing bases in six countries ensure a local source for fruit and vegetable producers and packers, a secure supply chain, a unique production capacity and optimum reactions to respond to seasonal changes in demand.

Wherever the producers and packers are located, the companies in the Fresh Produce division work in close coordination with them to supply them with the Group's entire range of products within the best lead times.

Each company's experience and local knowledge allows them to offer a large range of solutions, including cellular packaging, PP and rPET trays, cardboard trays, high-volume packaging for small fruits, baskets and rPET lids with an innovative design, promotional trays for soft fruit, grapes, etc.

The GUILLIN Group's Fresh Produce division is also represented beyond Europe by an established distribution network that allows it to track the orders of European fruit and vegetable importers from distant countries.

Transparent.

Lightweight, durable.

Hygienic and suitable for food contact.

Shock and temperature resistant and temperature resistant from -40°C to +60°C.

Recyclable.

Why is polyethylene terephthalate such a useful material? It is transparent, impact-resistant, and able to withstand low temperatures. Of course, it is also waterproof and impermeable to gas and aroma components.

PET can be recycled and reused, especially now sorting rules have been simplified.

PET/rPET the most transparent solution

PP the most versatile solution

Soft and flexible.

Transparent or available in different colours.

Microwavable or can withstand reheating temperatures of up to 120°C.

Recyclable and reusable.

Polypropylene is the most suitable material for reheating food products due to its ability to withstand high temperatures.

It is perfectly suited to recycling using standard sorting and waste recovery channels.

Available in transparent, white or coloured versions. This material is particularly resistant to abrasion and bending.

All products marked as ALTER ECO RECYCLE can be recycled.

Solid board the most customisable solution

The corrugated board, in constant qualitative evolution both in the performance and in the services offered, has always been and continues to be a protagonist of our daily lives.

Fundamental the function of the waves, true load-bearing pillars that give strength and strength, while cushioning, at the same time, the shocks coming from the outside. Transformed into packaging, corrugated board becomes a robust fresh food container, ideal for grouping, transporting and protecting.

Corrugated board is a friendly product because:

- It guarantees 100% sustainability.
- It is constantly evolving in quality and always in step with new market requirements.
- Preserves and protects fresh products, facilitating their use and shelf impact in stores.
- Provides a strong communication vehicle.

Lightweight, easy to use.

Customisable.

Can be adapted to a range of different constraints (protection, impermeability, contact with food, etc...).

Recyclable, compostable.

This material consists of several layers of paper made from wood pulp, which is then shaped or folded and may have a film coating on the inside to prevent leaks.

Cardboard has a whole host of aesthetic and mechanical properties, no matter what dimensions you require.

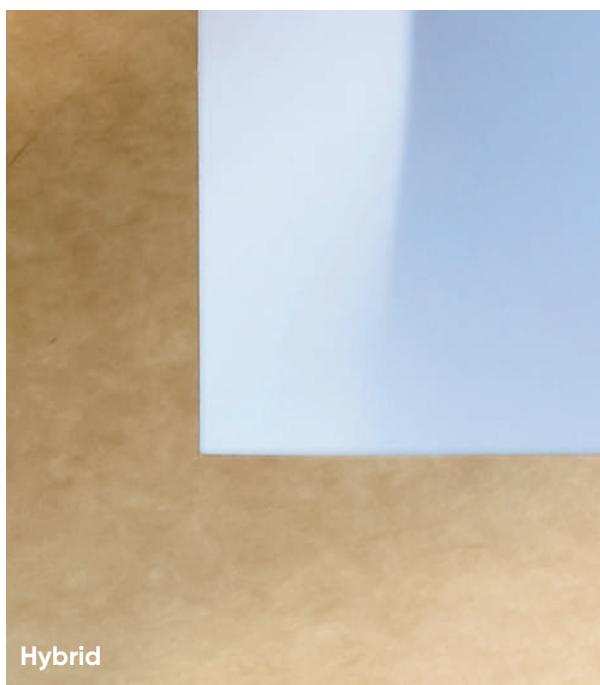

This material is identified in sorting centres. All our products are made from virgin fibres, suitable for use with foodstuffs, and can be recycled in standard paper/cardboard waste streams.

100% innovative and sustainable cardboard packaging solution

If you thought all cardboard packaging was the same, think again!

Here we guide you through different types of cardboard packaging and the properties of the materials, so that you can find the right option for you.

From now on, the range also includes **CIESSE PAPER** products, with a wide selection of solid and corrugated cardboard solutions for packaging and transporting food, fruit and vegetables.

From plateaux and trays, all **CIESSE PAPER** packaging is entirely customisable and recyclable. Lots of special shapes to meet every need, designed and manufactured to enhance the products in the shop, to be transported safely and without damage, to communicate all their characteristics to the consumer.

To consult the range product go to pages 130 - 131.

Our wide range of cardboard products includes:

- solid and corrugated board solutions
- completely recyclable and totally customisable
- suitable for all Fruits and vegetables
- resistant to moisture

To consult the range product go to page 122.

**Contemporary clamshell solutions offering superb
functionality, clarity and design.
Enhancing pre-weighted consumer units.**

OPTIMUM TRANSPORT

MADE IN
EUROPE

A clamshell package, as the name implies, is comprised of two joined pieces of packaging material, which completely surround the product and protect it from outside elements, easily open and securely close, enhancing produce by keeping food fresh, safe, and visible to the end consumer. The clamshell also provides a convenient stack and store container that will continue to protect produce, thus prolonging shelf life.

With individual portions or snack-sized packaging, we can easily take our healthy snack with us without having to fear contamination or food safety, because each pack is sealed.

Individually packaged snacks also cut down on food waste, because leftovers are easy to take with us and eat later.

Convenient, portable and efficient shakers and snack containers to fit an on-the-go lifestyle!

**A complete range in PET
made of
Prevented Ocean Plastic™
certified
OceanCycle®**

OPTIMUM TRANSPORT

Top seal packaging offers a number of benefits, including extending the shelf life and reducing over-packaging, cutting storage and transport costs.

Top sealing also helps improve food safety by creating a strong hermetic seal that minimises the risk of contamination, providing consumers with effective tamper evidence.

The top seal film acts as a barrier against external agents that can cause food deterioration, thus reducing food waste.

The customisation of trays and tray films also offers the opportunity to stand out and promote your brand!

The Breeze concept is a system with 4 side vents that creates an optimal flow of ventilation inside the punnet:

- Cold air entering the punnet is immediately pushed up due to the Venturi effect, which significantly accelerates the evacuation of hot air from the bottom of packaging
- Improved air circulation below the fruit
- Reduced cooling time for fruits and vegetables
- Extension of shelf life
- Easier handling of the punnet after the filling process
- Increased rigidity and ergonomics
- Allows full visibility of the product

DUALIPACK

FIRST HYBRID TOP SEAL
PUNNETS

KRAFT

rPET

Automatically separate during sorting

resistant

eco-friendly!

- 50% less plastic
- Cardboard can be printed on two sides
- Airtight and sealable, even in the presence of contamination
- Recyclable: no glue or adhesives
- Materials can be separated automatically at the sorting centre

nice to know!

Smooth wall with windows. Interior black as standard with a Kraft cardboard exterior.

Our cardboard solutions provide together safety, sustainability and functionality.
Cardboard is moisture resistant. Separate lid are made in recycled PET. New heat sealable solutions are totally protective for soft fruit or cut products.
Produced in Europe, they are recyclable, 100% customisable and 100% sustainable.

Solid Cardboard solutions

SOLID BOARD

RECYCLABLE

ECODESIGNED

MADE IN
EUROPE

We design and manufacture solid cardboard trays for fruit and vegetables, to transport your products safely and display them in the shop with ease. The trays can be entirely customised, supplied printed with a graphic of your choice or left blank for your personal labels. Our solid cardboard trays ensure that your products arrive in the same perfect condition as they left the farm or warehouse, suitable for different types of fruit and vegetables and tailored to your individual needs.

LOAD CATALOGUE

Offer all customization

Each food has specific characteristics of weight, size, texture and colour. For this reason, we can design and manufacture solid and corrugated cardboard trays so that the fruits of your work can:

- present themselves at their best in an outfit suited to their value
- be transported without any damages
- communicate all their properties to the consumer.

100% CUSTOMISABLE

Easy to print
Enhance your product
Boost your sales
and your brand name

Corrugated solutions provide the best resistance to worldwide transportation or to heavy product. Closure choice among stretch filmed trays, flowpacked punnets or punnets with separate lid offer all possibility of optimised conditionning lines. They are protective, easy-to-store and take care of environment while they are all recyclable with paper sorting.

Corrugated Cardboard solutions

CORRUGATED BOARD

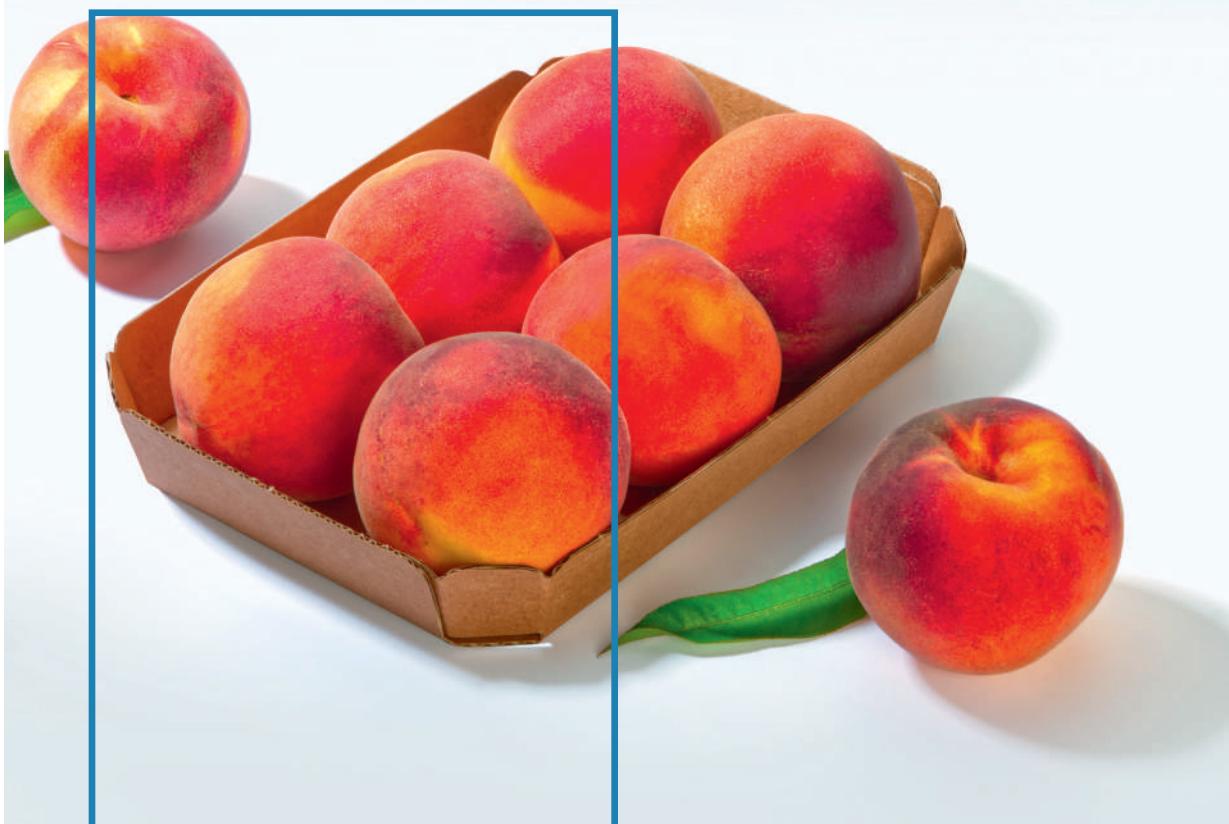

RECYCLABLE

ECODESIGNED

Corrugated cardboard trays provide a stable and robust cushion for produce, a compact and lightweight layer of protection during handling and transit.

Corrugated trays can also be customised and printed to give your products an extra visual boost on the shelf, a great way to promote your brand and help it stand out from the crowd!

**The most protective for delicate produce.
Especially word wide transport and importation.
High protection from consumer manipulations, hygiene
preservation with stretch film.**

Expanded trays

EPS

RECYCLABLE

ECODESIGNED

RIGIDITY

MADE IN
EUROPE

Traditional expanded trays are an irreplaceable ally for the food industry.

The trays are also perfect for packaging in a protective atmosphere and guarantee excellent food preservation.

The lightness of EPS trays, combined with their specific characteristics, make them extremely environmentally friendly, with a low carbon footprint, and they are also extremely cost-effective!

PP

Our Nestipack are a complete range of trays with inserts for fruit and vegetables. These trays offer growers easy-to-use packaging in a wide range of sizes and formats.

Our insert trays have an optimised shape that provides perfect coverage to prevent bruising of the fruit, these inserts prevent movement, making them the ideal packaging solution for inclined displays. Customisation options are also available to increase shelf visibility and enhance branding.
